Mendon Highway Department
101 Semmel Road
Honeoye Falls, NY 14472-9755

Town Board Meeting, September 13, 2010
@ Mendon Town Hall

F.Y.I.

1. Next week the process of installing a concrete bathroom will begin. We expect to dig the hole on Monday, and set the holding tank on Tuesday. Once in place and checked, the remaining structure will be delivered and installed. The bathroom is funded through a Community Block Grant through Monroe County.

2. The Community Center parking lot was striped last week. The paint-striping machine was borrowed from HFL and Hwy. Personnel conducted the painting. We are anticipating the sealing and stiping of the lot next year.

3. Gates are on order for the Great Bend Park and the soccer field. They should be installed shortly. Once the gates are in place, we anticipate the placement of large stones to discourage driving around the gates. We were able to obtain some large stones from a County project on Pinnacle Road.

4. Roadwork is beginning to wind down. We recently assisted Wheatland with a County project, paving North Road, near Union Street. The blacktop was hauled out of the Stafford, NY. We also have been assisting Rush finishing some County shoulder work on Telephone and Rush-W. Rush Rds.

5. In all, the Highway Department stoned and oiled app. 15 miles of Town and County Roads. The Dept. also milled and filled Hurlingham Drive, Bosworth Field, Chorley Wood Court, and a portion of Hopper Hills Way south of Drumlin View.

6. The Highway Department still has some County work remaining on Boughton Hill Road and Parrish Road. Parrish Road will see the relining of a culvert.

7. The tennis courts at Semmel Road Park and Mendon Center Park have been resurfaced and striped. Both courts are open for business.

8. The Highway Department has received its final shipment of salt under the '09-'10 contract. 345 ton of road salt is now stored in a stone bin, under a tarp. The excess of salt is the result of a milder March than was anticipated. The cost of the salt is $.01 cheaper than the current price for '10-'11.

9. The lumber for the ice rink at Mendon Center is being removed and will be utilized at the Semmel Rd. ice rink. Depending upon the weather, the ice rink tarp will be installed in November or December at Semmel Road.

10. The fall brush pick up, utilizing unexpended funds in this year's budget, will commence Monday, October 5. Number phone calls have been received and the callers seem quite pleased that the Town has authorized the fall pick up.

Respectfully,
William E Smith

William E. Smith
Highway Superintendent
