

Mendon Highway Department
101 Semmel Road
Honeoye Falls, NY 14472-9755
Town Board Meeting, October 17, 2016
@ Mendon Town Hall

F.Y.I.

1. The Highway Department concluded the fall brush pick up today. This two week pick up time is about the norm for the fall work. We have accumulated a large pile of brush that should be ground in the coming weeks.
2. We still have some small jobs to be completed for the County. These may continue into the winter.
3. We have started the preparation for winter. The trucks are in the process being outfitted with salters. Soon the delineators and snow fence will be put into place.
4. This year we will be assigning the dispatch duties on the evening and overnight shifts, during the week, to two of our full time employees. This will allow greater attention to the roads throughout the week, since these employees have the ability to operate the larger plow equipment and reload salt when necessary.

Respectfully,

William E. Smith,
Highway Superintendent
