

Mendon Highway Department
101 Semmel Road
Honeoye Falls, NY 14472-9755

Town Board Meeting, February 22, 2010
@ Mendon Fire Department

F.Y.I.

1. When time has allowed, we have hauled in app. 250 ton of stone to the storage area in preparation for surface treating Town roads this summer. We had trouble last summer obtaining stone, and this storage will be a backup, should a shortage occur this summer.
2. Preliminary date indicates that the price of blacktop may be up this summer. When the County issues the results of their bids, we may have to adjust our road maintenance program for the summer.
3. We have held a few safety training sessions with the highway personnel. The effort is to get the employees to think about safety practices and utilize them at work and away from work. Employees also viewed a video on "Your Public Image". This dealt with how the public may misinterpret their actions, without knowing what is actually occurring.
4. The highway department has tentatively scheduled a Defensive Driving Course through our insurance carrier, First Niagara. This will be presented on April 14th at the Community Center. All highway personnel are required to attend, and other Town employees and family members are welcome. We need a final number by April 1.

Respectfully,

William E. Smith
Highway Superintendent
