

Mendon Highway Department
101 Semmel Road
Honeoye Falls, NY 14472-9755
Town Board Meeting, February 8, 2016
@ Mendon Town Hall

F.Y.I.

1. The mild winter continues. Last year at this time we were concerned with running out of salt for the roads. So far this year, we have plenty of salt. The highway department has begun preliminary planning for a salt storage facility. A new facility with larger capacity will aid in reducing this rubber-band effect on how much salt we purchase and store.
2. The mild winter has allowed use to get some of our housekeeping completed at the highway department. Interior painting is being completed. Old road millings have been put down in the area of the brush pile in an effort to reduce the muddy conditions.
3. Work has also been completed at the Community Center. A new laundry tub was installed, along with painting of downstairs areas. A second dehumidifier was installed to reduce humidity and mold in the basement level.
4. Roadside drainage work and brush trimming has also been conducted along Town and County roads.

Respectfully,

William E. Smith,
Highway Superintendent
