

Mendon Highway Department
101 Semmel Road
Honeoye Falls, NY 14472-9755
Town Board Meeting, July 15, 2013
@ Mendon Town Hall

F.Y.I.

1. On Thursday, June 13, the skies opened up and Mendon experienced heavy rain. Numerous roads and property experienced flooding as the rains continued throughout the day. Once the rains subsided, the waters receded. Most high water was the result of the amount of rain exceeding the capacity of the drainpipes.
2. Last Monday, the Village started its North Main sewer project. The Town is providing manpower and equipment to assist with the work. As in the past, the Town will be reimbursed for the labor, but not the equipment usage.
3. The roadside mower installation on the John Deere tractor has been completed and the roadside mowing started in earnest. The new mower is a vast improvement over the older mower that was sold at auction.
4. The north end of Amann Road and Buggywhip Trail have had the pavement recycled and will receive a coating of stone and oil next week, assuming the weather holds. The work is scheduled for the same time that other Town and County Road receive the stone and oil.
- 5.

Respectfully,

William E. Smith,
Highway Superintendent
